Digital Transformation with Electronics

We take   roducts.

What We Offer

Hardware Design

Working across all product development phases from concept stage to production, our electronics design engineers perform systems design, schematic design, PCB layout, modeling, simulation, verification, test, integration, and hand-off to manufacturing.

Zapario has decades of experience in electronics hardware design for industrial and commercial
such as medical, automation, smart cities, power, renewables, instrumentation, transportation, IoT,
wearable electronics, and more.

Rapidly Transfer Prototype to Production

The same highly skilled team of electronics engineers
tightly coordinate and collaborate with the factory. We
perform thorough knowledge transfer critical to
manufacturing to quickly move prototypes to
production.

Eliminate Overhead and Reduce Co

Without the unnecessary overhead of managir
multiple suppliers, you reduce your overall cost
design, build, and manufacturing of your electr
product.

Minimize Product Risk, Offload Non-Core Tasks
